Driving Licence

ABOUT ME

I am a versatile and adaptable designer, allowing me to work a broad variety of projects, in various fields, with a multidisciplinary team and stakeholders.

My curiosity and empathy - fuelled by including the user into my design process - lead me to deliver meaningful and relevant experiences to people.

I consider myself a problem solver and a facilitator. I add a clear value within a company based on educating people on the fundamental role of innovation and promoting experimentation to push the boundaries of this innovation.
